

Thank You for purchasing a reflective address sign from Winthrop FireFighters Association. Following are some guidelines for helping you decide where to mount your sign.

SIGN MOUNTING GUIDELINES

- A. The sign is pre-drilled with 4 holes (one in each corner) so you can mount the sign horizontally or vertically.
- B. We recommend mounting the sign with at least 2 stainless steel screws to prevent rusting.
- C. Select a mounting spot that provides maximum visibility from the road from both directions of approach.
- D. Optimum location is at the driveway entrance
- E. Sign should be mounted at least 4 feet off the ground, higher if snow accumulates around the area of the sign.
- F. Avoid areas where snow mounds accumulate, snow plow debris flies, or where brush could block sign visibility.
- G. Periodically clean the sign with water to maintain its visibility and reflective quality.
